EDUCATION

University of South Australia

Bachelor of Software Engineering (honours) | GPA: 6.57/7

Adelaide, SA

Feb 2024 — Dec 2026

PROJECTS

Desktop Sudoku app, Creator

Jan 2025 — Present

- Created a full-stack Sudoku application in Python using Tkinter for the GUI. Implemented and optimised NP-complete algorithms to solve and generate Sudoku boards. My algorithm was able to solve 100,000 Sudoku puzzles within 30 seconds.

Community Discord Bot, Creator and Maintainer

Sep 2024 — Present

- Originally developed in 7 days for a code jam event, and is now an open-source project where club members can use it as an introduction to contributing to open source.
- Used by club executives to manage memberships, events and club members.
- Created in Python using the Discord.py library. Hosted with 99%+ uptime on Microsoft Azure.

EXTRACURRICULAR ACTIVITIES

UniSA Programming Community (UPC)

Aug 2024 — Present

- Co-Founder and Co-President of UPC, a club designed to connect committed students dedicated to a career in software engineering and host events designed to develop attendees' technical skills.
- Organised many software engineering-based events. including, hackathons, code-jams, competitive programming, workshops and collaborated with similar clubs across Adelaide.

Jane Street Electronic Trading Competition

Mar 2025

- Created algorithmic trading bots within a group in the aim of outperforming the other bots inside a simulated market.
- Utilised strategies such as market making, arbitrage and spread trading.

Competitive programming

Feb 2025

- Participated in a ICPC style competitive programming competition that was sponsored by IMC.
- Collaborated in a team of 3 to solve difficult programming problems, often focused on mathematics or data structures and algorithms.

Ravi's Study Program

Nov 2024 — Feb 2025

- Actively participated in an intensive collaborative course led by volunteers who are in graduate or internship positions at big tech or HFT companies. The course involved a comprehensive theory study on DSA, as well as applying technical problem-solving skills to DSA and OOD problems.

Hack South 1.0

Nov 2024 — Jan 2025

- Organised a hackathon that received a GitHub sponsorship, over 40 people attended university students across the 3 major universities in Adelaide, and people from the industry.
- Mentored 12 groups, aiding with design, technical issues and preparation for presentations.

AWARDS

Year 11 - Year 12

Lambton High School

Newcastle, NSW

Feb 2022 — Dec 2023

- 2 University of Newcastle Excellence Awards.
- 2 Lambton High School Academic Excellence Medals.
- 3 Lambton High School first in Course Awards.d Development in both years 11 and 12.

SKILLS

- Programming Languages:** Python, Java, CSS/HTML, SQL, C++
- Technologies:** Git, Bootstrap, Flask, Microsoft SQL Server Management Studio
